

Connecting the VPC expansion connector

Connect the expansion connector to the VPC board:

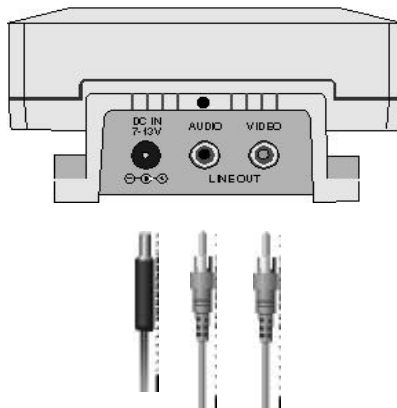

Setting up the camera

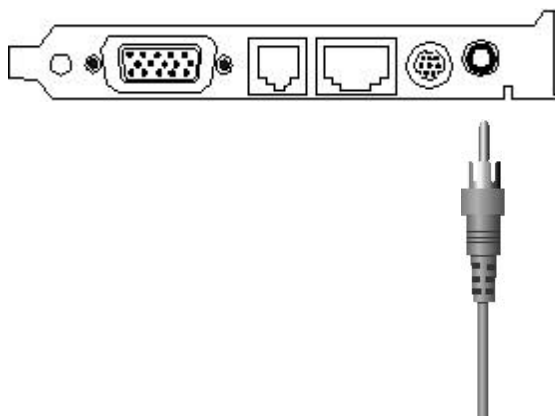

- 1 Unpack the camera and place it on the PC's monitor.

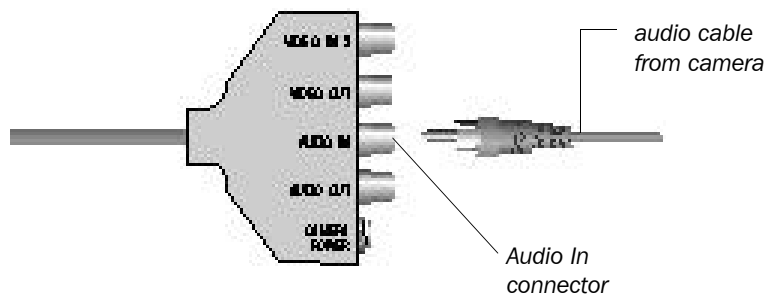

- 2 Connect the camera cables to the back of the camera:

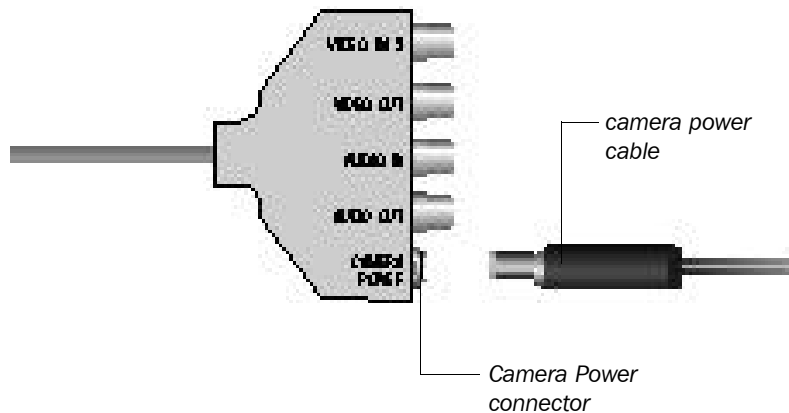

- 3 Connect the RCA cable plugged into the camera's video connector to the VPC board's **Video In** connector:

- 4 Connect the RCA cable plugged into the camera's audio connector to the **Audio In** connector on the VPC's expansion connector.

- 5 Plug the camera power cable into the **Camera Power** connector on the VPC's expansion connector.

Move the lens cover away from the camera lens. The green light on the camera comes on.
